The following is an examiner's statement of reasons for allowance: the claims are directed toward a battery having an adhesive resin layer between a positive electrode and a negative electrode wherein the adhesive layer is joined directly to both electrodes. The adhesive resin layer consists of one layer and contains an adhesive resin and a filler wherein the resin is polyvinylidene fluoride homopolymer or polyvinyl alcohol. The adhesive resin and filler have the weight ratio, average particle size and peel strength as recited in claim 1. The prior art does not teaches the claimed resin and filler of the adhesive resin layer having the recited weight ratio, average particle size and peel strength. Note interview summary of 1/9/04.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
